

GENERAL INFORMATION

Outcome Indicator Name	: Student Academic Performance Index (Overall)	Department	: Academic and Learning Innovation (ALI) - UCC
Outcomes Category	: Student and Graduate	GD4 Criterion	: 7.2.1

Outcome Indicator Definition

The **Student Academic Performance Index (SAPI)** is a composite measure that evaluates the effectiveness of UCC's academic programs by assessing student success from enrolment to graduation. It consolidates key metrics such as attrition rate, passing rate, quality of passes, and graduation rate, providing a holistic view of academic performance and institutional effectiveness. By tracking these indicators, SAPI enables data-driven improvements in curriculum design, teaching strategies, and student support services, ensuring continuous enhancement in academic quality and student achievement.

This is part of GD4 7.2.1's requirement on Student and Graduate Outcomes.

PERFORMANCE MANAGEMENT

Benchmark Target	: 75.0	Calculation Method	: Weighted Average
Benchmark Origin	: Strategic Goals	Adjustment Frequency	: Annually
Formula	: $\text{SAPI} = (\text{Attrition Rate} \times 30\%) + (\text{Passing Rate} \times 30\%) + (\text{Quality of Passes} \times 20\%) + (\text{Graduation Rate} \times 20\%)$	Review Cycle	: Fixed Period Review

Formula Description

1. Description & Purpose

The **Student Academic Performance Index (SAPI)** is designed to measure institutional academic performance over time, ensuring that student outcomes align with UCC's strategic goals and educational standards. The index provides a structured assessment of student retention, course success rates, and graduation outcomes, allowing faculty and administrators to evaluate program effectiveness, identify learning gaps, and implement targeted interventions.

By integrating multiple Key Performance Indicators (KPIs) into a single score, SAPI enables trend analysis and comparative benchmarking, ensuring that academic policies, faculty development, and student support strategies are continuously refined. It helps UCC leadership monitor long-term trends, optimize student success initiatives, and strengthen institutional credibility.

2. What It Measures

SAPI evaluates academic effectiveness through four critical KPIs:

- **Attrition Rate:** Measures the percentage of students who withdraw before completing their programme, indicating student retention challenges and areas requiring intervention.
- **Passing Rate:** Assesses the proportion of students who successfully pass their courses, reflecting the effectiveness of instructional delivery and assessment strategies.
- **Quality of Passes:** Evaluates the proportion of high-achieving students (e.g., those earning distinctions or honors), providing insights into academic excellence and curriculum rigor.
- **Graduation Rate:** Tracks the percentage of students who complete their programme as expected, demonstrating institutional support, course effectiveness, and student preparedness.

These metrics are used to identify performance trends, support policy adjustments, and ensure that students receive the necessary academic resources for success.

3. Index Components & Formula

The Student Academic Performance Index (SAPI) is calculated using a weighted average formula, ensuring that key academic performance indicators contribute proportionally to the final score. The formula consolidates four essential metrics—attrition rate, passing rate, quality of passes, and graduation rate—each weighted according to its impact on student success. Higher attrition rates negatively affect the index, signaling retention challenges, while higher passing and graduation rates improve the score, indicating effective course delivery and student support. The quality of passes measures the proportion of top-performing students, reflecting academic rigor and teaching effectiveness.

Each metric is normalized to a 0-100 scale, allowing for consistent comparisons across academic years. The weighted approach prevents any single factor from disproportionately influencing the overall score, ensuring a balanced evaluation of student performance. The formula's structure enables UCC to monitor academic trends, refine intervention strategies, and enhance student outcomes through data-driven curriculum planning and targeted support initiatives.

4. How to Read the Index

- **Higher SAPI Score (Above 85):** Indicates strong academic performance, with high retention, successful student progression, and consistent graduation rates. A score in this range suggests that UCC's instructional methods, student support systems, and curriculum design are effectively supporting student success.
- **Moderate SAPI Score (75-85):** Suggests stable but improvable performance, where academic outcomes meet expectations but some refinements may be needed. Areas such as course difficulty adjustments, enhanced faculty training, or targeted student interventions may be explored to ensure continuous progress.

- **Lower SAPI Score (Below 75):** Highlights academic challenges, requiring immediate intervention in areas such as student retention, faculty development, curriculum enhancements, and learning support services. A declining score in this range may indicate systemic issues affecting student achievement.

SAPI results are used to refine instructional strategies, enhance student success initiatives, and adjust course structures to optimize learning outcomes.

5. Benchmarking & Rationale

SAPI is benchmarked against internal institutional trends to ensure continuous improvement and academic performance tracking.

- **Initial Benchmark Target:** 75 on a 100-point scale, set as a performance threshold to measure student achievement and programme effectiveness.
- **Why 75?** This score is based on the average of previous years' performance, ensuring that it is both realistic and slightly below the historical mean. This allows UCC to set an achievable yet challenging target for academic improvement.
- **Internal Benchmarking:** Comparisons are made across previous academic years, allowing UCC to monitor trends and address areas requiring intervention.
- **Potential Adjustments:** As student demographics, course structures, and instructional methods evolve, benchmarking values may be revised to maintain alignment with UCC's academic goals and best practices.

6. Advantages & Strategic Impact

- **Comprehensive Insight:** SAPI integrates multiple KPIs into a single measure, offering a full view of academic health and institutional effectiveness.
- **Strategic Guidance:** The index helps inform curriculum refinements, student retention strategies, and academic service planning.
- **Performance Benchmarking:** Enables year-on-year comparisons to track student success trends and measure the impact of academic interventions.
- **Stakeholder Confidence:** Provides transparent, data-backed evidence of academic quality, fostering trust among students, parents, faculty, employers, and accrediting bodies.
- **Continuous Improvement:** SAPI allows for targeted refinements in teaching methodologies, student engagement strategies, and faculty development programs, ensuring UCC remains at the forefront of academic excellence.

INDIVIDUAL BENCHMARKING

Metric	:	Graduation rate	Benchmark Target:	90
Calculation Method	:	Moderated Three-Year Average	Benchmark Origin	Strategic Goals

Justification and Notes	:	• Consistent Achievement: Data consistently shows very high graduation rates (approaching 100% in each year). • Mission-Driven Goal: Ensuring every enrolled student completes their programme aligns with UCC's commitment to learner success and programme quality. • Institutional Credibility: A 90% graduation benchmark maintains UCC's image of rigorous but supportive academic pathways. The 90% benchmark takes into account 5% attrition and 5% failure.		
Evaluation and Follow-Up:	:	Evaluation: • Progress Checks: Each semester, identify students lagging behind academically or financially, especially among part-time adult cohorts. • Quality Meetings investigate any non-completers, exploring remedial or personalised pathways. Follow-Up: • Personalised Completion Tracks: Provide extra time or alternative scheduling for adult learners balancing work/family. • Resource Allocation: Expand academic advising, peer mentoring, and bridging modules so all students remain on track to graduate.		
Metric	:	Quality of passes	Benchmark Target:	5
Calculation Method	:	Moderated Three-Year Average	Benchmark Origin	Strategic Goals
Justification and Notes	:	• Anticipation of Larger Cohorts: Although the historical data has shown fluctuations in high distinction rates (1.1% to 24.25%), a 5% benchmark is realistic when expecting an increase in overall student numbers. It acknowledges the variability and challenges inherent in larger, more diverse cohorts. • Defined Excellence Threshold: The metric specifically focuses on students achieving distinctions or grades of 85% and above, underscoring UCC's commitment to recognising truly exceptional performance. • Incremental Growth Goal: Aiming for 5% sets a balanced target—ambitious yet achievable—while encouraging both faculty and students to strive for deeper mastery.		

Evaluation and Follow-Up:	:	Evaluation: • Distinction Tracking each semester, examining which programmes or modules yield top performers. • Quality Meetings determine if assessment design is challenging enough for high achievers. Follow-Up: • Advanced Support & Enrichment: Offer specialised workshops, research projects, or honours-level tasks to push capable learners above 85%. • Recognition & Incentives: Reinforce distinction achievement with awards, scholarships, or career acceleration resources, encouraging deeper mastery.		
Metric	:	Passing rate	Benchmark Target:	: 95
Calculation Method	:	Moderated Three-Year Average	Benchmark Origin	: Strategic Goals
Justification and Notes	:	• Four-Year Average: The historical average passing rate (calculated at roughly 97.68%) is very high, but may not reflect future variance once cohorts grow in size. • Buffer for Larger Cohorts: Lowering the benchmark to 95% accommodates a broader student base, including those who might need additional attempts or support. • Continuous Improvement: A 95% target remains ambitious yet realistic, balancing high academic standards with an acknowledgement of cohort diversity.		
Evaluation and Follow-Up:	:	Evaluation: • Track how many students pass on first attempt vs. remedial attempts. • Compare pass rates across different intakes or delivery modes in Quality Meetings to identify modules needing adjustments. Follow-Up: • Academic Rigour & Assessment Design: Refine criteria, ensuring real-world tasks that encourage deeper mastery, not just minimal passing. • Enhanced Student Support: Provide on-demand tutorials, varied-time study groups, and 1-to-1 mentorship. Adult learners juggling work/family benefit from these flexible resources.		

QUALITY PERFORMANCE OUTCOMES

STUDENT ACADEMIC PERFORMANCE INDEX (OVERALL)

Metric	:	Attrition Rate	Benchmark Target:	5
Calculation Method	:	Moderated Three-Year Average	Benchmark Origin	Strategic Goals
Justification and Notes	:	• Historical Data: Across the past three years, there were multiple instances (2021–2023 cohorts) with zero withdrawals reported. • Strategic Priority: An aspirational target of 5% attrition underscores UCC's commitment to student retention and institutional support. • Institutional Culture: Setting attrition at 5% signals a strong focus on early interventions, personalised guidance, and continuous student engagement.		
Evaluation and Follow-Up:	:	Evaluation: • Monitor any signs of withdrawal through Assessment Plan/Result and highlight factors (financial, academic, personal) that might push adult learners to exit early. • Quality Meetings verify if proactive interventions (e.g., part-time counselling, schedule flexibility) maintain zero attrition. Follow-Up: • Early-Intervention Alerts: If a student shows poor engagement or repeated absences, staff initiate immediate advising. • Retention Initiatives: Strengthen mentoring, remedial support, and personal outreach to preserve the 0% target even as cohorts evolve.		

DATA SOURCE

No	Source	UOM	Normalisation Method	Notes
1	Assessment Plan	Nos	-	Outline the structure and strategy for course assessments, including weightage and evaluation criteria. This ensures consistency in academic measurement and alignment with institutional learning objectives.
2	Assessment Result	Nos	-	Provide detailed insights into individual and cohort performance levels. This data forms the foundation for calculating passing rates and quality of passes, ensuring a transparent evaluation of student outcomes.
3	Quality Meeting	Nos	-	Formal meetings where academic performance data, including assessment results and plans, are reviewed and validated. These meetings, typically involving the Examination Board, approve key decisions related to assessment quality, results validation, and overall academic standards.

Data Source Notes

Normalisation

Attrition Rate: $(100 - (\text{Sum of "Attrition Rate" values from "TabPassing And Attrition Rate - Parent" where "Parameter" = "Attrition Rate"})) / (\text{Total count of entries in "TabPassing And Attrition Rate - Parent" where "Parameter" = "Attrition Rate"}) * 100 * 0.3$

Passing Rate: $(\text{Sum of "No of Students Passed" values from "TabPassing And Attrition Rate - Parent" where "Parameter" = "No of Students Passed"})) / (\text{Sum of "No of Students" values from "TabPassing And Attrition Rate - Parent" where "Parameter" = "No of Students"}) * 100 * 0.3$

- Assessment Results provide direct insight into student achievement and support analysis of academic performance trends.
- Assessment Plans ensure a structured and transparent approach to evaluating learning outcomes, aiding in curriculum planning and compliance with quality standards.
- Quality Meetings are pivotal for governance and validation, ensuring that academic practices meet institutional and regulatory expectations. These meetings often serve as a platform for making data-driven decisions to enhance academic quality and integrity.

PERFORMANCE INDICATORS

No	Metric	Weighted Value	%	Source Data	Notes and Rationale
1	Attrition Rate	30	30	Enrolment/withdrawal data	Measures the percentage of students who discontinue their studies before completion. Reflects institutional effectiveness in retention and addressing student needs.
2	Passing rate	30	30	Exam results	Tracks the percentage of students who pass their courses, indicating the effectiveness of teaching methods and curriculum delivery.
3	Quality of passes	20	20	Grading records	Evaluates the proportion of high-quality passes (e.g., distinctions, for student who score 85% and above), showcasing academic excellence and the institution's ability to produce top achievers. We are using UOM % to monitor this.
4	Graduation rate	20	20	Expected No of Student Graduate / Actual No of Student Graduate	Tracks the percentage of students successfully completing their courses as per forecast. Highlights programme effectiveness and institutional support in guiding students to completion.
5	Overall Score	100	100		

Total Score Type : Numerical Rating (e.g., 0-100)

Minimum Value : 0 **Maximum Value** : 100

Performance Indicators Notes

The **Student Academic Performance Index (SAPI)** is a composite measure that evaluates key academic performance indicators, providing a comprehensive view of institutional effectiveness in supporting student achievement.

- **Attrition Rate (30%)**: This measures the proportion of students who discontinue their studies before completion. It is a critical indicator of institutional capacity to retain students and highlights the effectiveness of student support services, academic guidance, and curriculum relevance. High attrition rates often point to gaps in meeting learners' needs or programme alignment with expectations, necessitating strategic interventions.
- **Passing Rate (30%)**: Tracks the percentage of students who meet the minimum requirements to pass their courses. This metric reflects the quality of teaching methodologies, assessment strategies, and the alignment of course content with learning outcomes. High passing rates suggest effective academic delivery, while low rates signal potential areas for improvement in instructional practices or learner support.
- **Quality of Passes (20%)**: Evaluates the proportion of students achieving high-quality passes, such as distinctions or A grade or 85% and above. This highlights academic excellence and reflects the institution's success in fostering top-performing learners. By focusing on this metric, institutions can assess the impact of advanced pedagogical approaches and enrichment initiatives on student outcomes.
- **Graduation Rate (20%)**: Measures the percentage of students who successfully complete their courses within the expected timeframe. This metric is a key indicator of programme effectiveness and institutional support systems, ensuring students are guided from enrolment to completion. High graduation rates demonstrate alignment between academic processes and learner preparedness.

PERFORMANCE COMPARISON

Internal vs External Data Comparison

DATA FOR BENCHMARKING

Year	Int. Value	Int. Trend	Ext. Value	Ext. Trend
2021	81.8	→	-	-
2022	84.85	↑	-	-
2023	79.73	↓	-	-
2024	78.57	↓	-	-
2025	83.64	↑	-	-

INTERNAL DATA FOR BENCHMARKING

Year	Value	Trend
2021	81.8	→
2022	84.85	↑
2023	79.73	↓
2024	78.57	↓
2025	83.64	↑

Note: Refer to the Metric Performance Data in the appendix below for more information.

No. 1			
Year	:	2021	Data Source : Internal Surveys
Value	:	81.8	Rating Type : Numerical Rating (e.g., 0-100)

QUALITY PERFORMANCE OUTCOMES

STUDENT ACADEMIC PERFORMANCE INDEX (OVERALL)

Data Availability	:	Available	Quality Meeting Link	:	-
Evaluation	:	• Highlights: Zero dropouts, 100% pass rate, full graduation, but limited high-distinction outcomes. • Interpretation: Strong fundamentals; borderline achievements reflected in lower quality-of-passes metric. • No of students: 7 from Diploma in Business Management (Mandarin) (E-Learning)			
Follow-Up	:	Because SAPI was not yet formally introduced, UCC did not respond in real-time to these findings.			

No. 2					
Year	:	2022	Data Source	:	Internal Surveys
Value	:	84.85	Rating Type	:	Numerical Rating (e.g., 0-100)
Data Availability	:	Available	Quality Meeting Link	:	-
Evaluation	:	• Highlights: Maintained 100% pass rate and graduation, with a slight increase in distinction-level passes. • Interpretation: Academic delivery remained consistent; some improvements in top performance. • No of students: 1 from Diploma in Business Management (Mandarin) (E-Learning)			
Follow-Up	:	SAPI was still not officially in use, so no direct interventions were triggered in 2022.			

No. 3					
Year	:	2023	Data Source	:	Internal Surveys
Value	:	79.73	Rating Type	:	Numerical Rating (e.g., 0-100)
Data Availability	:	Available	Quality Meeting Link	:	-

QUALITY PERFORMANCE OUTCOMES

STUDENT ACADEMIC PERFORMANCE INDEX (OVERALL)

Evaluation	:	• Highlights: All students passed and graduated, but top-level distinctions declined. • Interpretation: Quality of passes dropped, signalling a need for stronger high-achiever support. • No of students: 7 from Diploma in Business Management (Mandarin) (E-Learning) • No of students: 3 from Diploma in Business Management (E-Learning)
Follow-Up	:	No official follow-up was carried out in 2023 due to the continued absence of a formal SAPI review framework.

No. 4			
Year	:	2024	Data Source : Internal Surveys
Value	:	78.57	Rating Type : Numerical Rating (e.g., 0–100)
Data Availability	:	Available	Quality Meeting Link : UCC-CG-004
Evaluation	:	• Students appear increasingly focused on meeting minimum requirements for certification, rather than pursuing in-depth mastery. • Earlier cohorts (2021–2022) produced more top-tier outcomes, hinting that current teaching, assessment approaches, or student motivation strategies might need adjustment. • No of students: 2 from Diploma in Business Management (Mandarin) (E-Learning)	

Follow-Up	Academic Rigour & Assessment Design • Refine Assessment Criteria: Incorporate real-world, higher-order tasks to drive distinction-level achievements. • Faculty Workshops: Train lecturers to design fair yet challenging online assessments that differentiate top performers. Enhanced Student Support • Flexible Remedial & Enrichment: Offer on-demand tutorials and varied-time study groups for busy adult learners. • Mentoring & Motivation: Provide one-to-one guidance, linking academic excellence to tangible career progression. Monitoring & Continuous Improvement • Quarterly SAPI Reviews: Track dips or gains in pass quality and intervene swiftly. • Faculty Feedback Loop: Hold virtual forums to share best practices and strengthen teaching approaches. Student Engagement & Career Relevance • Career Path Emphasis: Invite industry professionals and align content with practical workplace scenarios. • Co-curricular & Practical Exposure: Encourage competitions, project showcases, and research, fostering deeper mastery beyond minimal passes.
------------------	--

No. 5			
Year	: 2025	Data Source	: Internal Surveys
Value	: 83.64	Rating Type	: Numerical Rating (e.g., 0-100)
Data Availability	: Available	Quality Meeting Link	: UCC-CG-012
Evaluation	Gap Analysis Summary 1. The Student Academic Performance Index (SAPI) for 2025 recorded a value of 83.64, which is above the institutional benchmark target of 75. This indicates that overall academic performance remained strong and that UCC continued to maintain effective teaching delivery, student support, and academic monitoring mechanisms. 2. All core academic outcome indicators performed positively. Attrition rate remained at 0%, indicating that no students withdrew during the reporting		

period. The **passing rate reached 100%**, showing that students were able to complete their assessments successfully. The **graduation rate also recorded 100%**, demonstrating that enrolled students progressed and completed their programmes as expected.

3. However, the **Quality of Passes metric remained comparatively low**, with a normalised contribution of **18.2%** within the weighted index. This indicates that although students are successfully completing their programmes, the proportion of **distinction-level achievements (85% and above)** remains limited.
4. This pattern suggests that the academic system is effective in supporting **student completion and minimum competency achievement**, but further effort is required to **strengthen higher-order academic mastery and distinction-level outcomes**.

Root Cause Analysis Notes

1. **Strong Student Retention and Support** Attrition remained at **0%**, indicating that institutional retention mechanisms such as academic monitoring, teacher support, and student communication remain effective. Students appear able to remain engaged and complete their programmes successfully.
2. **High Passing and Completion Rates** The **100% passing and graduation rates** demonstrate that course delivery, assessment structures, and student support mechanisms remain functioning effectively. This reflects stable academic management and adequate learning support structures.
3. **Limited Distinction-Level Performance** Although students are passing successfully, the relatively low **quality-of-passes metric** suggests that many students may be focusing on **meeting minimum passing requirements rather than achieving deeper mastery** of the course material. This may also reflect the profile of adult learners balancing study commitments with work and family responsibilities.
4. **Small Cohort Effects** UCC continues to operate with **very small cohorts**, which means that individual academic outcomes can significantly influence the overall performance indicators. As student numbers increase, the distribution of distinction-level outcomes may become more stable and representative.

Success Indicators

The success of improvement actions will be measured using the following indicators:

- Maintain **attrition rate at or below the 5% benchmark target**.
- Maintain **passing rates above the 95% benchmark threshold**.
- Sustain **graduation rates above the 90% institutional benchmark**.
- Increase the **proportion of distinction-level passes above the 5% benchmark target**.
- Maintain the **overall SAPI score above the institutional benchmark of 75**.

- Demonstrate stable academic performance trends as student cohorts expand.

Follow-Up

:

Corrective Action Plan
1. Strengthen Academic Rigour and Distinction-Level Performance

Assessment design will be reviewed to incorporate more **analytical, applied, and higher-order learning tasks** that encourage deeper mastery rather than minimal pass performance. Teachers will be encouraged to incorporate case-based and real-world assessment tasks that allow stronger students to demonstrate advanced competency.

2. Enhanced Academic Enrichment Opportunities

Additional **academic enrichment activities** will be introduced for students who demonstrate strong performance potential. These may include advanced research assignments, project-based learning activities, or extended coursework that encourages higher achievement.

3. Improved Student Academic Guidance

Teachers will provide **more targeted academic guidance and feedback** to help students move beyond basic competency towards stronger academic performance. Early feedback during coursework will allow students to improve before final assessments.

Continuous Monitoring of Academic Indicators

- Academic performance indicators including **pass rate, distinction performance, and completion rates** will continue to be reviewed during **Quality Meetings and Examination Board discussions** to ensure that emerging trends are identified early and appropriate interventions are implemented.

Timeline for Corrective Actions:

- Assessment design review will begin in **Q1 2026**.
- Academic enrichment initiatives will be implemented from **Q2 2026 onwards**.
- Academic monitoring and performance review will continue **throughout the 2026 academic cycle**.

Responsibility Assignment:

- **Academic and Learning Innovation (ALI)** will review curriculum and assessment design.
- **Teachers** will provide academic mentoring and enrichment support.
- **Strategic and Quality Management (SQ)** will monitor academic performance indicators and report outcomes during quality meetings.
- **Examination Board** will review academic results and validate improvement actions.

EXECUTION

QUALITY GOAL ALIGNMENT

Quality Goal	:	UCC-QGL-240004
KRA	:	Improve and maintain academic outcomes.
KPI	:	Continuously improve educational quality by implementing changes based on student feedback, aligning efforts with the Student Academic Performance Index. The long-term goal is to boost the student experience through enhanced technology integration, global interaction opportunities, and hands-on learning approaches.
Alignment Notes	:	Academic outcomes provide direct indicators of course effectiveness, but do not capture the broader student learning experience. Addressing disparities in student support and instructional quality is essential for achieving consistent performance across diverse cohorts.

STAKEHOLDER ENGAGEMENT

No	Engagement ID	Shareholder	Engagement Type	Channel	Frequency	Timing
1	SRE-0965	Students	Informative	Website	Annually	Real-time
2	SRE-0966	Academic Board Member	Informative	Meetings	Annually	During Staff Meetings
3	SRE-0967	Examination Board Member	Informative	Meetings	Annually	During Staff Meetings
4	SRE-0978	Regulatory Bodies	Informative	Reports	Annually	Pre-scheduled
5	SRE-0972	Staff FT (Academic)	Informative	Meetings	Annually	During Staff Meetings

RISK ASSESSMENT

No	Risk Register	Work Activity	Risk / Hazard Identification	Risk Trigger / Possible Injury	Existing Risk Controls
----	---------------	---------------	------------------------------	--------------------------------	------------------------

QUALITY PERFORMANCE OUTCOMES

STUDENT ACADEMIC PERFORMANCE INDEX (OVERALL)

No	Risk Register	Work Activity	Risk / Hazard Identification	Risk Trigger / Possible Injury	Existing Risk Controls
1	RRMP-02343	Performance Management	Poor performance not addressed, affecting service quality and compliance	No review cadence, weak documentation, delayed action	Periodic reviews, informal feedback
2	RRMP-02333	Change Management	Resistance to change impacting strategic plan execution	Lack of engagement and communication with stakeholders	Stakeholder engagement programs and clear communication strategies
3	RRMP-02332	Staff Training and Development	Competency gaps affecting strategic implementation	Inadequate training programs	Regular training needs assessment and customized training programs
4	RRMP-02187	Workplace culture development	Workplace conflicts	Societal trends	Diversity and inclusion programs
5	RRMP-02354	Internal Communication	Internal miscommunication causes execution errors	Unclear instructions, lack of change communication	Meetings, shared updates
6	RRMP-02191	Labor relations management	Disputes affecting operations	Unionization and collective bargaining trends	Labor relations strategy
7	RRMP-02185	Compliance with employment laws	Legal non-compliance penalties	Legal changes in employment law	Legal compliance reviews

RISK MITIGATION

No	Risk Register	Justification	Risk Mitigation
1	RRMP-02343	Undetected or unaddressed performance issues hinder improvement efforts, reduce overall productivity, and may prevent timely intervention to support academic quality.	Conduct regular and structured performance evaluations; provide timely feedback and implement follow-up corrective actions.

No	Risk Register	Justification	Risk Mitigation
2	RRMP-02333	Resistance to change can slow down or derail strategic initiatives, affecting the institution's adaptability and long-term academic objectives.	Engage stakeholders through clear communication strategies, training sessions, and change management workshops to gain buy-in and support.
3	RRMP-02332	Competency gaps in staff can impact the effectiveness of teaching methods, curriculum delivery, and overall student outcomes, reducing the institution's academic standards.	Perform regular training needs assessments and offer customised staff development programmes to strengthen competencies and teaching quality.
4	RRMP-02187	Poor workplace culture can lead to conflicts, reduced staff morale, and lower quality of academic services, undermining institutional goals.	Implement diversity and inclusion initiatives, promote open dialogue, and establish clear policies that encourage a supportive, collaborative work environment.
5	RRMP-02354	Ineffective internal communication leads to low staff engagement and missed opportunities for improvement, impacting student experience and academic delivery.	Set up reliable feedback mechanisms (e.g., surveys, suggestion boxes), ensure regular staff briefings, and use communication platforms to foster transparency.
6	RRMP-02191	Labour disputes can disrupt academic operations, delay strategic initiatives, and damage institutional reputation, affecting student and staff satisfaction.	Develop a proactive labour relations strategy, maintain open channels for negotiation, and regularly review policies to address staff concerns early.
7	RRMP-02185	Non-compliance with employment laws can result in legal penalties, financial losses, and reputational damage, ultimately detracting from academic objectives.	Conduct regular legal compliance reviews, update policies in line with legislative changes, and provide staff training on regulatory requirements.

APPENDIX

METRIC PERFORMANCE DATA

No	Year	Metric	Observed Value	Scale Maximum	Normalised %	Notes and Rationale
1	2025	Attrition Rate	30	30	100	No student withdrawals were recorded during the reporting period. This indicates that student retention mechanisms, academic support, and communication between teachers and students remain effective. The result reflects stable learner engagement and successful monitoring of student progression throughout the programme.
2	2025	Passing rate	30	30	100	All students successfully passed their assessments during the reporting period. This demonstrates that the teaching delivery, assessment structure, and learning support mechanisms were effective in helping students meet the required academic standards.
3	2025	Quality of passes	3.64	20	18.2	The proportion of distinction-level achievements remained relatively modest. While students successfully met the course requirements, fewer students achieved grades at the distinction level (85% and above). This suggests that students may be focusing on achieving passing outcomes rather than pursuing deeper academic mastery.

QUALITY PERFORMANCE OUTCOMES

STUDENT ACADEMIC PERFORMANCE INDEX (OVERALL)

No	Year	Metric	Observed Value	Scale Maximum	Normalised %	Notes and Rationale
4	2025	Graduation rate	20	20	100	All enrolled students completed their programmes as expected during the reporting period. This reflects strong academic guidance, effective programme management, and sufficient institutional support that enables students to progress from enrolment to completion successfully.
5	2024	Attrition Rate	30	30	100	No dropouts
6	2024	Passing rate	27.69	30	92.3	Du Xue failed 2 modules and passed after resubmission.
7	2024	Quality of passes	0.88	20	4.4	Very few top distinctions noted.
8	2024	Graduation rate	20	20	100	All current students on track to finish.
9	2023	Attrition Rate	30	30	100	No withdrawals reported for this cohort.
10	2023	Passing rate	29.52	30	98.4	Miao Lin failed 1 module and passed after resubmission.
11	2023	Quality of passes	.22	20	1.1	Very low share of high distinctions.
12	2023	Graduation rate	20	20	100	All students completing on schedule.
13	2022	Attrition Rate	30	30	100	Zero attrition again this year.
14	2022	Passing rate	30	30	100	100% course pass rate maintained.
15	2022	Quality of passes	4.85	20	24.25	Fair number of top achievers.
16	2022	Graduation rate	20	20	100	Everyone progressed to programme end.
17	2021	Attrition Rate	30	30	100	No student dropouts from this cohort.

QUALITY PERFORMANCE OUTCOMES

STUDENT ACADEMIC PERFORMANCE INDEX (OVERALL)

No	Year	Metric	Observed Value	Scale Maximum	Normalised %	Notes and Rationale
18	2021	Passing rate	30	30	100	All participants passed their courses.
19	2021	Quality of passes	1.8	20	9	Few top-performers; borderline mastery.
20	2021	Graduation rate	20	20	100	100% completion recorded.
