

1. OVERVIEW

Survey Name	: End of Module Survey (Student) v.03	Survey Version No	: 03
Department	: Course Management (CM) - UCC	Posting Date	: 16 June 2025

Survey Description

The "End of Module Survey (Student)" collects feedback from students to evaluate the effectiveness of module delivery, including teaching quality, learning resources, assessment practices, student support services, facilities, and communication during the learning process.

For **modular series courses** (e.g. Diploma Courses), the survey is conducted at the end of each module to capture immediate feedback while the learning experience is still fresh. For **modular parallel courses** (e.g. Preparatory Courses), the survey is conducted periodically, typically every three months, to evaluate the ongoing learning experience across active modules.

The feedback supports module and course review processes by providing timely insights into teaching effectiveness, learning resource adequacy, and assessment alignment with module learning outcomes. The results help identify areas for improvement and support continuous enhancement of academic delivery and student learning experiences.

Additional Notes

The survey has been meticulously crafted to align with the guidelines set forth in Item 2.4.2 of the Student Satisfaction Survey, focusing on a comprehensive evaluation of student satisfaction across various dimensions of their educational experience. The survey is structured to capture detailed insights into multiple aspects of the college environment, ensuring a thorough understanding of student needs and expectations.

The questions are divided into three primary sections, each tailored to explore distinct areas of the student experience:

1. **School (6 questions, Questions 1-6):** This section probes into the overall educational experience, quality and responsiveness of student support services, adequacy and accessibility of both physical and online facilities, effectiveness of college communications, and the accessibility and quality of teaching-learning resources. It aims to gauge the infrastructure and support systems that facilitate student learning and engagement.
2. **Teacher (5 questions, Questions 7-11):** Questions in this segment assess the performance of teaching staff concerning their knowledge, teaching style, and the clarity and effectiveness of their communication. This section also evaluates teacher punctuality and their ability to utilize teaching aids effectively, providing a direct measure of teaching quality and its impact on the learning environment.
3. **Assessment (3 questions, Questions 12-14):** Focused on the appropriateness and clarity of assessment methods and their frequency, this section seeks to understand how assessments contribute to or detract from the learning process, ensuring that they are aligned with educational objectives and effectively measure student progress.
4. **General Feedback (1 question, Question 15):** An open-ended question is included to capture any additional comments or feedback that students wish to provide. This allows students to express concerns or highlight experiences not specifically addressed by the structured questions, offering deeper insights into areas that may require attention.

The survey questions are designed not only to fulfill compliance with the stated educational standards but also to offer actionable insights that can drive improvements. By segmenting the survey into specific categories, it becomes easier to analyze the data and identify areas for enhancement, ensuring that the college can respond effectively to the needs and preferences of its students. This structured approach ensures that each element of the student experience is thoroughly examined, allowing for targeted interventions that can enhance student satisfaction and educational outcomes.

No	Risk Register	Justification	Risk Mitigation
1	RRMP-02436	This survey helps gauge the effectiveness of student support services throughout the module, which can significantly impact student learning and satisfaction.	Ensure that survey results are analyzed to pinpoint service gaps and areas for enhancement. Develop action plans to improve these services, such as tutoring, mentoring, and academic advising, and communicate changes and improvements to students to ensure transparency and continued feedback.
2	RRMP-02435	Feedback collection on support services through the student survey is essential to understand the utility and effectiveness of these services from the student's perspective.	Set up a systematic process for regularly reviewing feedback and implementing changes. Engage students in focus groups to dive deeper into survey results and understand their needs better. Adjust and enhance support services accordingly and inform students about how their feedback has led to tangible improvements.

3. DISTRIBUTION AND REPORTING

4. TARGET AND BENCHMARK

TARGET

Target Response Rate (%)	:	80
---------------------------------	---	----

Target Response Rate Justification:

Setting a target response rate at 80% is designed to ensure a substantive analysis even with smaller sample sizes, such as classes where a few students, like 3, represent a significant portion of the feedback pool. Achieving around two-thirds participation is crucial to obtaining meaningful insights while accounting for the small cohort sizes and minimizing the impact of outlier responses.
