Survey Name	: End of Course Survey v.02	Survey Version No	: 02
Department	: Course Management (CM) - UCC	Posting Date	: 16 June 2025

Survey Description

This survey is designed to capture detailed feedback from students concluding their studies at United Ceres College (UCC). The survey is structured to assess various dimensions of the student experience, including their academic journey, the effectiveness of teaching, support services, and their future plans post-graduation. By collecting data on students' immediate plans, such as further studies, workforce entry, or entrepreneurial ventures, UCC aims to evaluate and adapt its educational offerings and support systems to better align with graduate trajectories.

Additionally, the survey seeks insights into the efficacy of UCC's events and activities in skill development, as well as the overall learning environment as perceived by the students. Feedback on administrative support post-course completion is also gathered to enhance administrative interactions and facilitate smoother transitions for students. The comprehensive feedback obtained will not only guide curriculum enhancements but also inform strategic decisions and policy revisions, ensuring that UCC continues to provide a robust educational experience that meets the needs and expectations of its student body.

4. TARGET AND BENCHMARK

TARGET

Target Response Rate (%)	: 70
---------------------------------	------

Target Response Rate Justification:

Setting a target response rate at 70% is both pragmatic and strategic, particularly for an "End of Course Survey." This adjusted rate accounts for the challenges in reaching graduates who may no longer be easily accessible or highly engaged once they have completed their courses. A 70% response rate is ambitious enough to provide substantial data to inform educational improvements, yet realistic given the typical difficulties in tracking down alumni for feedback. This rate ensures that the data collected is still representative and robust enough to yield statistically meaningful insights, despite the potential post-graduation dispersal of respondents.
